

Pilot Creek on the Clark's Fork of the Yellowstone and Beartooth Pass

Total Estimated Travel to either destination (i.e., Pilot Creek or Beartooth Pass

145 miles ---2 hours 36 minutes

Total Estimated Travel between either destination

17 miles --- 23 minutes

Route taken will be ...

Camp Buffalo Bill (A) – Cody (B)

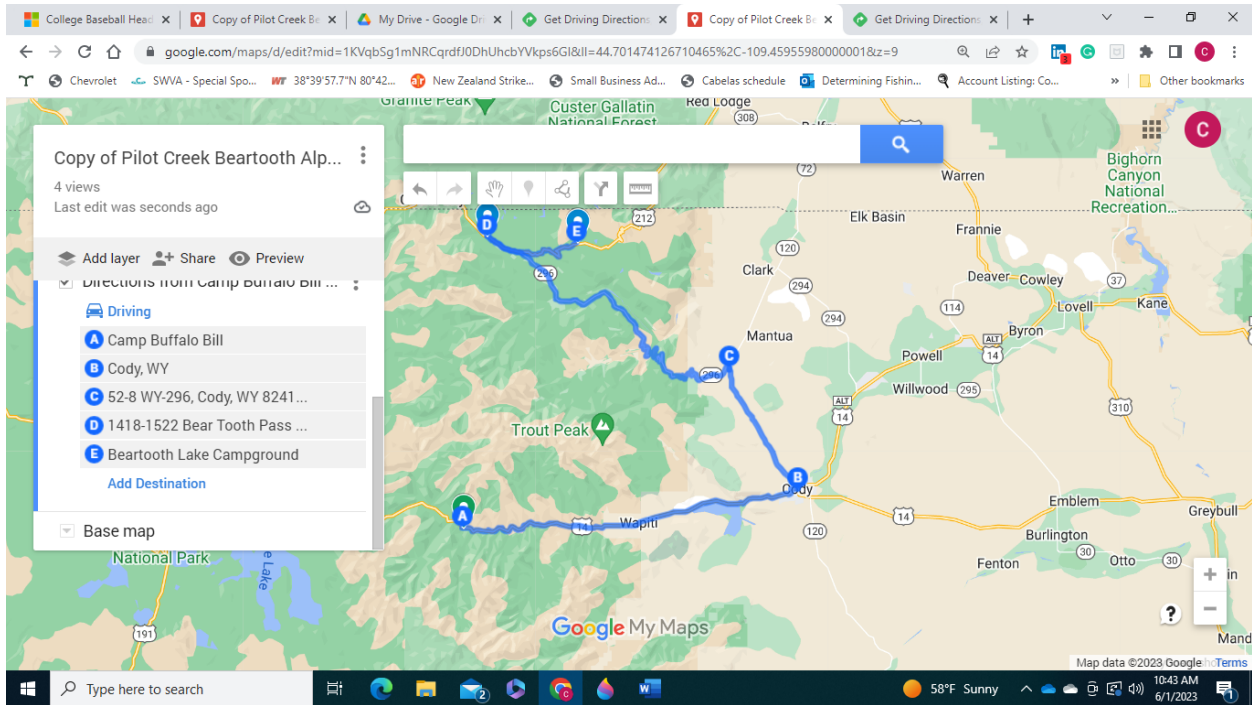

43 miles --- 47 minutes

Cody (B) to Chief Joseph Scenic Highway (C)

30 miles --- 32 minutes

Chief Joseph Scenic Highway (C) to Pilot Creek (D) OR Beartooth Pass (E)

66 miles --- 1 hour 17 minutes

BEARTOOTH RAVINE & LAKE

Two large and popular waters on Hwy 212, a few miles west of its junction with Hwy 296, are Beartooth Lake and Island Lake. Each has a campground and picnic area, as well as a boat launch, where wakeless boating is authorized. The lakes holds four different species of trout, with an occasional the line. The scenery is beautiful, the air fresh and the fish are (mostly) willing...especially in the summer at and dusk. Pull into the Beartooth Lake area and campground, and visit one of most breathtaking and easily accessible mountain lakes in the West. Nestled at base of Beartooth Butte, pictures of Beartooth Lake often reflect this amazing geological wonder. Easy access to the shoreline of Beartooth makes it a popular destination, and the Forest campground is a favorite stop of highway travelers...if just to use the restrooms and take for snapshots

Clarks Fork Yellowstone River Fishing Report

Fly fishers who seek to get far from the maddening crowd should consider the Clark's Fork, as it offers ample fish, scenic beauty and alluring solitude. The river makes its grand entrance into Wyoming from Montana through a rift in the jagged,

glaciated Absaroka Mountains. Surrounded by soaring, snow-capped peaks, the river is bounded by the Beartooth Mountains to the northeast and the rugged Sawtooth Mountains to the southeast. Running for over 60 miles through the state, its upper waters are full of Yellowstone cutthroat, rainbow and brook trout while grayling and brown trout can be found below the famous Canyon section as the river makes its way back to Montana.
